POLE TOP SEAL
Distribution: # PTS17
Transmission: # TPTS20

Pole Life Seal is part of our Life Extension Products Line. It will prevent further wood Pole top decay and weathering.

Material = It is a peel and stick rubberized Product. Heavy thickness, UV rated Automotive Grade material.

Two Sizes = #PTS17 Fits most Distribution poles from 5" to 9" pole top diameter. Product is 17" & 20" overall diameter can be custom sized.
Transmission #TPTS20 fits 8" to 12" diameter pole tops.

Installation is simply, just place product on top of existing pole top, adjust into position around existing bolts & hardware. Pull off two side taps of clear backing, press adhesive material into place around pole. If needed install some nails into the flap areas for added adhering.

This is the only peel & stick product that is designed and Pre-cut out for existing damaged/decayed wood pole tops. The simplest product you can install in a bucket with gloves on.
