

TRANSMISSION POLE REINFORCEMENT KIT

Part # TPR48SK – S-M-L-ExL

Part # TPR72SK – S-M-L-ExL

Structural Reinforcements

www.polelifesystems.com

FOR LARGER SCALE POLE DAMAGE
CAUSED BY WOODPECKERS, CRACKING, ETC.

9" to 17" Diameter Wood Poles.

Stocked 48" & 72" lengths, can be custom made
to any length or diameter.

TPR48/72 SK – S for 9" to 11" diameter poles.

TPR48/72 SK – M for 12" to 13" diameter poles.

TPR48/72 SK – L for 14" to 15" diameter poles.

TPR48/72 SK – Ex L for 16" to 17" diameter poles.

- Large Diameter Wood Poles – A 2-Part galvanized 1/8" steel reinforcement installed over the damaged area which brings the pole back to almost full strength. This prevents total pole replacement for minor damage. No foam, wrap or glue required.

ANSI Tested Strength:

Longitudinal = 5,000 lbs. Transverse = 5,000 lbs.

***Kits include (2) Steel Parts**

***Bolts and hardware**

Not included.

Weight per kit set of 2:

TPR48S-SK: 62 lbs. each

TPR48S-MK: 68 lbs. each

TPR48S-LK: 80 lbs. each

TPR72S-SK: 92 lbs. each

TPR72S-MK: 102 lbs. each

TPR72S-LK: 120 lbs. each

TPR72S-ExLK: 140 lbs. each
